Net Zero Asset Managers Initiative Triples in Assets Under Management as 43 New Asset Managers Commit to Net Zero Emissions goal

- *43 new investor signatories to Net Zero Asset Managers initiative will work in collaboration with clients to achieve 2030 emissions reduction targets and reach net zero by 2050 or sooner.*
- *The Net Zero Asset Managers initiative now has a total 73 signatories representing \$US32 trillion in assets under management (AUM), 36 per cent of the global total¹*
- *Net Zero Asset Managers initiative is now accredited by the UNFCCC Race to Zero campaign*

Asset managers representing over \$US22.8 trillion of assets under management (AUM) today announced that they are new signatories to the Net Zero Asset Managers initiative. Following the launch of the initiative in December 2020, 43 additional asset managers are making new, enhanced commitments to support the goal of net zero greenhouse gas emissions by 2050 or sooner, in line with global efforts to limit warming to 1.5°C.

The Net Zero Asset Managers initiative now has a total 73 global asset manager signatories, representing \$US32 trillion in assets under management, representing more than a third (36 per cent) of the total assets under management across the globe. The breadth of signatories signals the determination of investors to play their part in achieving a net zero and resilient future and the global significance of the Net Zero Asset Managers initiative.

Ben Way, Chief Executive Officer, Macquarie Asset Management, said: “Last year we reconfirmed our commitment to tackling climate change by announcing we would manage our portfolio in line with global net zero emissions by 2040. Today, we are proud to continue this journey as we join the Net Zero Asset Managers initiative to work with our industry colleagues to accelerate the transition to a low carbon future. We recognise the need for action is urgent. As a global asset manager, we have a responsibility and opportunity to invest to deliver positive and sustainable impact for everyone.”

To ensure real world progress ahead of 2050, the asset manager signatories have committed to set interim targets for 2030, consistent with a fair share of the 50 per cent global reduction in greenhouse gases identified by the Intergovernmental Panel On Climate Change (IPCC) to halt global warming at 1.5°C. Supporting the acceleration of action, signatories will submit an interim target, within a year of joining the initiative, for the proportion of assets to be managed in line with reaching net zero emissions by 2050 or sooner.

Asset managers joining the initiative commit to transparent and rigorous accountability. Signatories will annually report progress against the Task Force for Climate-related Financial Disclosures (TCFD) recommendations, including setting out a climate action plan and submitting this to The Investor Agenda via its partner organisations for review to ensure the approach applied is based on a robust methodology, consistent with the Race to Zero criteria, and action is being taken in line with the commitments.

¹ <https://www.bcg.com/en-gb/publications/2020/global-asset-management-protect-adapt-innovate>

Drawn from across the world, the new signatories to the Net Zero Asset Managers initiative are: Algebris Investments, Allianz Global Investors, APG Asset Management, Aviva Investors, BlackRock, Boston Common Asset Management, Boston Trust Walden, Brookfield Asset Management, Capricorn Investment Group, Cardano Holding Limited, Danske Bank Asset Management, Developing World Markets, FullCycle, Invesco Limited, J Safra Sarasin Sustainable Asset Management, JGP Gestão de Crédito & JGP Gestão de Recursos, Jupiter Asset Management, La Banque Postale Asset Management, La Financière de l'Echiquier, Lazard Asset Management, LGT Capital Partners, Lombard Odier Investment Managers (LOIM), Macquarie Asset Management, Maitri Asset Management, Majedie Asset Management, Mirova, Montanaro Asset Management, Newton Investment Management, Nissay Asset Management Corporation, NN Investment Partners, Nykredit Wealth Management, Pemberton Capital Advisors, Rathbones Greenbank Investments, Royal London Asset Management, RockCreek, SAM Investment Holdings, SEB Investment Management, Stafford Capital Partners, Standard Life Aberdeen, Storebrand Asset Management, Terra Alpha Investments, Tikehau Capital, and The Vanguard Group.

Larry Fink, Chairman and Chief Executive Officer, BlackRock, said: “The asset management industry plays an important role as an advisor, at the nexus between asset owners and corporations. Helping investors prepare their portfolios and capture investment opportunities on the path to net zero is one of our greatest responsibilities. BlackRock is proud to put its name behind this initiative, and I am encouraged to see the increasing momentum towards net zero across the public and private sectors.”

Tim Buckley, Chairman and Chief Executive Officer, Vanguard, said: “Climate change represents a long-term, material risk to our investors’ portfolios. As a steward of our clients’ assets, we recognize the crucial role we and others play in driving real progress on climate risk over time. As part of our ongoing efforts to tackle this important matter, we will continue to engage with portfolio companies, industry regulators, and policymakers, and today we add our commitment to the Net Zero Asset Managers initiative. We look forward to helping drive collaborative and constructive dialogue across our industry to establish win-win solutions for long-term shareholder return and the goal of net-zero emissions by 2050.”

The Net Zero Asset Managers initiative is managed globally by six founding partner investor networks: Asia Investor Group on Climate Change (AIGCC), CDP, Ceres, Investor Group on Climate Change (IGCC), Institutional Investors Group on Climate Change (IIGCC) and Principles for Responsible Investment (PRI). In turn, the initiative is endorsed by The Investor Agenda, of which the investor networks are all founding partners, along with the United Nations Environment Programme Finance Initiative (UNEPFI).

Emma Herd, Chief Executive Officer, Investor Group on Climate Change (IGCC), said: “The acceleration of the asset management industry’s response to climate change is critical to delivering on the aims of the Paris Agreement and protecting the global financial system from systemic physical and transitional risks. The expansion of participation in the Net Zero Assets Managers Initiative sends a further signal to the Australian and New Zealand markets that global capital is swinging behind a net zero emissions and resilient future.”

The Net Zero Asset Managers initiative is now accredited by the United Nations Framework Convention on Climate Change (UNFCCC) Race to Zero campaign. Led by the High-Level Climate Champions for Climate Action, Nigel Topping and Gonzalo Muñoz, Race To Zero mobilises a coalition of leading net zero initiatives, joining 120 countries in the largest ever alliance committed to

achieving net zero carbon emissions by 2050 at the latest.

Nigel Topping, UK High Level Climate Champion for COP26, said: “This is the first critical Breakthrough for the Race to Zero and especially the asset management industry, with 73 Asset Managers representing over \$32 trillion now committed to the net zero transition. Net zero emissions is fast becoming the guiding star for climate ambition, and this momentum must continue to finance the transition to a zero-carbon economy.”

To support the governance of the initiative, an advisory group has been appointed to the Net Zero Asset Managers initiative drawn from representatives from initial signatory asset managers. The members of the advisory group appointed are Wendy Cromwell, Wellington Management; Edward Mason, Generation; Chris Newton, IFM Investors; Catherine Ogden, LGIM; Takeo Omori, Asset Management One; Corinna Orbach, DWS. The advisory group will consider and provide recommendations to the Net Zero Asset Managers founding partners with regard to the operation of the initiative and serve as champions for its work.

Further commitments from other leading asset managers are expected over coming months.

- ENDS -

Further signatory comment

Asia

Maitri Asset Management – Manish Tibrewal, Chief Executive Officer, Maitri Asset Management: “Joining the Net Zero Asset Managers initiative is a further extension of Maitri’s commitment to be a responsible, principles-based asset manager who is committed to helping achieve the goals of the Paris Agreement, mitigate climate risk and seize the enormous investment opportunities presented by the clean energy transition. Addressing climate change will require global collaboration, and asset managers have a significant opportunity to work with our clients, peers and stakeholders on this shared journey to net zero.”

Nissay Asset Management Corporation - Hiroshi Ozeki, President and Chief Executive Officer, Nissay Asset Management Corporation: “We are very pleased to participate in the Net Zero Asset Managers initiative. As a global citizen, we believe that climate change is an urgent and significant issue to be resolved, and that it is our social responsibility as an investor to pass on the irreplaceable global environment to the next generation. Needless to say, this issue cannot be resolved by one firm alone. By taking collective action with all other members, Nissay Asset Management is strongly committed to accelerate the transition towards the goal of net zero greenhouse gas emissions by 2050 or sooner and we will actively be involved in building a more sustainable society.”

Australasia

Macquarie Asset Management – Ben Way, Chief Executive Officer, Macquarie Asset Management: “Last year we reconfirmed our commitment to tackling climate change by announcing we would manage our portfolio in line with global net zero emissions by 2040. Today, we are proud to continue this journey as we join the Net Zero Asset Managers initiative to work with our industry colleagues to accelerate the transition to a low carbon future. We recognise the need for action is

urgent. As a global asset manager, we have a responsibility and opportunity to invest to deliver positive and sustainable impact for everyone.”

Europe

Aviva Investors - Dr Steve Waygood, Chief Responsible Investment Officer, Aviva Investors: “The climate crisis, and reaching net zero, is without doubt the biggest challenge facing humanity. Only by harnessing the power of capital markets do we stand a chance of delivering what the science tells us we must do to stabilise climate change and prevent it from accelerating beyond our control. Aviva Investors will play our full role and we warmly welcome the creation of the Net Zero Asset Manager Initiative.”

Algebris Investments - Davide Serra, Founder and Chief Executive Officer, Algebris Investments: “As investment managers, when taking asset allocation decisions, we recognise the role we play as a powerful engine behind a just transition towards a greener, fairer and more sustainable economy. This shift will depend on each and every one of us and it is crucial, especially for future generations, that businesses have a clear action plan. We are proud to join the Net Zero Asset Managers initiative, to accelerate the transition towards global net zero emissions while supporting our clients set and meet decarbonisation goals for their portfolios.”

Allianz Global Investors - Tobias Pross, Chief Executive Officer, Allianz Global Investors: “Climate change is one of our planet’s most pressing challenges, and AllianzGI believes that asset managers should take a more active role. Following our recent announcement of our new stewardship approach: Climate engagement with outcome, aimed at engaging with companies on the climate transition pathway towards a low carbon economy, we are pleased to be joining the Net Zero Asset Managers initiative. This is another milestone in our sustainability pathway, that complements the commitment made by Allianz Group in 2019.”

APG Asset Management – Peter Branner, Chief Investment Officer, APG Asset Management: “APG Asset Management, on behalf of pension fund clients, is committed to contribute to the goal of the Paris agreement to keep global warming limited to 1,5 degrees. This ambition is totally aligned with the Net Zero Asset Managers initiative, hence why we are pleased to join the group. Our clients have already established climate-related targets for 2025, such as investing in clean and affordable energy and reducing the carbon footprint in listed equities. This commitment empowers APG to advance this journey together with our clients. I am thrilled to see how our investment teams continue to identify climate related investments across both liquid and private assets in all regions we operate. It is encouraging in its own right and comforting for our clients to see that this happens without compromising return objectives.”

Cardano – Kerrin Rosenberg, Chief Executive Officer, Cardano UK “We support the Paris Climate Agreement of aiming to limit global warming to +1.5C versus preindustrial levels. We have committed our investment portfolios to net zero carbon emissions by 2050 and we will set ambitious interim targets. We have signed up to the Net Zero Asset Managers Initiative to share best-practice, coalesce around common methodologies, and to help send clear messages to our regulators and the companies we own of the need for a fast, smooth climate transition.”

Danske Bank - Christian Heiberg, Head of Asset Management, Danske Bank: “As an investor and distributor of investment products, we have a vital role to play in driving the low-carbon transition, thereby helping society reach its climate ambitions. By signing the Net Zero Asset Manager Initiative,

we have made an ambitious commitment for our own climate efforts - together with our peers we want to facilitate measurable, sustainable change.”

Invesco - Marty Flanagan, President and Chief Investment Officer, Invesco: “The implications of climate change are far-reaching and will have a transformational impact on markets, the global economy, society, governments and many other aspects of our lives. Investment managers have an important role to play in supporting investments aligned with global efforts to reduce the impact of climate change on our planet. As part of Invesco’s commitment to being a leading global ESG investment manager, we are pleased to join the Net Zero Asset Managers initiative, which will be a critical component of our efforts in this important work.”

J Safra Sarasin – Oliver Cartade, Head of Asset Management & Institutional Clients Division, J. Safra Sarasin Sustainable Asset Management: “J. Safra Sarasin Sustainable Asset Management is committed to contributing to the achievement of the Paris Agreement. In 2020, we published our Climate Pledge aiming for a carbon-neutral outcome for assets under management by 2035. By joining the Net-Zero Asset Managers Initiative, we reinforce our commitment and actively work with the financial industry towards net-zero.”

Jupiter Asset Management - Andrew Formica, Chief Executive Officer, Jupiter Asset Management: “The transition to net zero carbon emissions is imperative, and we have a responsibility to work together as an industry and a society to tackle climate change. Following the announcement of Jupiter’s commitment to net zero at both a company and investment level, we are pleased to be a part of this important initiative working on behalf of our clients and alongside so many others asset managers to drive real progress towards these transformational goals.”

La Banque Postale Asset Management - Emmanuelle Mourey, President, La Banque Postale Asset Management (LBP AM): “We have completed our 100% SRI transformation in 2020. At the same time, the challenges posed by the pandemic have increased the climate emergency. As a conviction and responsible asset manager, LBP AM is developing an ambitious climate strategy alongside organizations such as the Net Zero Asset Managers Initiative, driven by rigorous sectoral policies and investment in companies engaged in a fair and demanding transition of their activities.”

La Financière de l'Echiquier – Bettina Ducat, Chief Executive Officer, La Financière de l'Echiquier: “As a responsible and committed investor for 30 years, La Financière de l'Echiquier is determined to act towards accelerating the transition to carbon neutrality and to promote the marketing of low-carbon products and services. Our determination is the reason for our commitment to the Net Zero Asset Management Initiative, a demanding and transparent global initiative, co-constructed with companies, in line with our commitments and actions deployed in the fight against climate change.”

LGT Capital Partners - Roberto Paganoni, Chief Executive Officer, LGT Capital Partners: “As a long-term, family-owned and principal investor sustainability and ESG integration has been part of our business and investment processes for more than 15 years. We have been actively engaging with organizations to further the cause of sustainability in the financial industry continuously. Now, a logical milestone and next step is to commit to invest in alignment with the Paris Agreement in order to achieve net zero emissions by 2050 or sooner. Through the capital we invest, we support combatting climate change.”

Lombard Odier Investment Managers (LOIM) - Hubert Keller, Managing Partner, Lombard Odier: “The race to a net zero economy is a rapidly-unfolding transition of immediate financial relevance to all investors. Decarbonisation cannot be achieved merely by offsets or asset re-allocations but requires reductions in the real economy, requiring a detailed understanding of the transition

pathways and trajectories facing companies in each industry individually. At Lombard Odier, we are committed to developing investment processes that allow us to assess the alignment of our portfolios to this transition ahead, and through active management contribute to accelerating the transition to net zero.”

Majedie Asset Management - Rob Harris, Chief Executive Officer, Majedie Asset Management: “Climate change is the defining challenge for our generation. At Majedie, we have a clear responsibility to our clients to ensure our investment activities consider the material risks and opportunities posed by climate change from all angles. Our commitment to the Net Zero Asset Managers initiative is another important step we’re taking to move towards a more sustainable future.”

Montanaro Asset Management - Cedric Durant des Aulnois, Chief Executive Officer, Montanaro: “With every year that passes, the actions needed to address the climate crisis become greater. Montanaro has been supporting the climate agenda for many years, most notably through the investments made in our Better World Fund, but real change also requires collective action. With \$9 trillion under management, the Net Zero Asset Managers initiative has the means to make a significant difference in addressing the greatest crisis humanity has ever faced.”

Newton Investment Management/ BNY Mellon Investment Management - Andrew Downs, Interim Chief Executive Officer, Newton Investment Management: “Being a responsible and purposeful owner, on behalf of our clients, means having clear accountability and encouraging change at companies in which we invest to help drive the world towards a more sustainable future for all. At Newton, responsible investing has been part of our DNA since the 1970s and signing the Net Zero Asset Managers initiative is a natural next step in demonstrating our commitment to the goal of net-zero greenhouse gas emissions by 2050, and to supporting investments aligned with net-zero emissions by that time.”

NN Investment Partners - Satish Bapat, Chief Executive Officer, NN Investment Partners: “As investors, we acknowledge the impacts of climate change on society and our investments. Together with our peers, we have a role to play in limiting this impact. We strive to contribute to the commitments laid out by the Paris Agreement and Dutch Climate Agreement, in line with our responsible investing beliefs and investment goals. We are pleased to join the Net Zero Asset Managers initiative, and to collaborate with our clients and the companies we invest in, to further accelerate this transition towards global net zero emissions.”

Nykredit Asset Management - Peter Kjærgaard, Head of Wealth Management, Nykredit: “As asset managers, we play an important role in leading the way towards a sustainable future, channelling capital towards companies that are committed to reducing carbon emissions and holding them responsible for it. We have worked systematically with sustainable investments for more than a decade, and we are fully committed to achieving net zero carbon emissions by 2050 together with the other signatories of the Net Zero Asset Management initiative. Through the Nykredit group and together with the local and regional banks in the Sparinvest collaboration, we are in contact with clients across all of Denmark, as well as internationally, and we are looking forward to accelerating our efforts to help our clients invest in line with the Paris-agreement.”

Pemberton Asset Management S.A. - Symon Drake-Brockman, Managing Partner, Pemberton: “At Pemberton, we see ourselves as stewards of responsible investment, supporting our borrowers and sponsors in building value through sustainable growth. The Net Zero Asset Managers initiative fits in with our firm’s commitment to focus on the environmental and social impact we can have together.

To this end, we are proud to be carbon neutral firm and look forward to working with investors, borrowers and peers on future decarbonisation efforts.”

Rathbone Greenbank Investments - John David, Head, Rathbone Greenbank Investments: “The net zero asset managers initiative provides us with a clear roadmap to catalyse the continued transition of our investment portfolios to net zero greenhouse gas emissions by 2050 or sooner. It represents an opportunity for us to build on our longstanding approach to climate-aligned investing at Rathbone Greenbank – to advance our understanding of climate risk, maximise on exciting opportunities to invest in the energy transition and continue to empower our clients to invest their money as a force for good through our engagement activities.”

Royal London Asset Management – Andrew Carter, Chief Executive Officer, Royal London Asset Management: “RLAM is committed to being a responsible steward of our clients’ assets and we must play our part in achieving the goals of the Paris Agreement to prevent climate change becoming a crisis. We are proud to say we support the launch of the Net Zero Asset Manager Initiative. As part of this we commit to aligning our investments to net zero by 2050 and to engaging with the companies we invest in to ask them to do the same.”

Santander Asset Management - Mariano Belinky, Global Chief Executive Officer, Santander Asset Management: "At Santander Asset Management we are firmly committed to the initiatives looking to reduce carbon emissions, support the ecological transition and contribute to a more sustainable world. Being one of the asset managers that have signed up to the Net Zero Asset Managers initiative is another step towards our goal of becoming leaders and a reference in ESG both in Europe and Latin America. This commitment also represents an opportunity to continue offering innovative investment solutions to our clients, aligned with their current interests and social concerns."

SEB Investment Management - Javiera Ragnartz, Chief Executive Officer, SEB Investment Management: “For SEB Investment Management, addressing climate change and the huge challenge that it means for companies, people and the planet, is a strategic priority. We aim for assets under management to be net zero by 2040, and for this purpose, joining the Net Zero Asset Managers initiative is key. We look forward to collaborating with our peers and with investee companies in working towards the common goal of net zero.”

Stafford Capital Partners - Angus Whiteley, Chief Executive Officer, Stafford Capital Partners: “The challenges of climate change will be addressed by embracing the transition to a net zero GHG emissions economy, and the sooner the transition takes place, the better the outcomes will be. As an investor in global forestry and low carbon solutions Stafford Capital Partners is delighted to be able to commit to this important initiative, and to continue providing solutions that not only deliver financial returns but help achieve the transition to net zero. We are certified as CarbonNeutral as a company, and we are committed to achieving this goal across our portfolio by 2050 or sooner.”

Standard Life Aberdeen - Stephen Bird, Chief Executive Officer, Standard Life Aberdeen: “We are delighted to join the Net Zero Asset Manager initiative today and demonstrate our support for the global net zero 2050 goal. This is another significant milestone in our commitment to play a constructive role in the decarbonisation of the global economy and enable our clients to reach their net zero ambitions. To drive that change, we are developing a range of net zero solutions and look forward to working with our clients to increase the percentage of our AUM that is aligned to net zero over time.”

Storebrand Asset Management - Jan Erik Saugestad, Chief Executive Officer, Storebrand Asset Management: "There is a lot we as investors and asset managers can do on our own in accelerating the green transition, but we are much more powerful in alliances. It is when investors, asset managers and governments join forces we are most successful in creating action on the ground. On climate action, we win or lose together. Our commitment to become net-zero by 2050 dates back to 2019 and we have set targets to reduce our emissions by over 30 % by 2025. Joining forces with fellow Asset Managers on this journey serves as a powerful catalyst and inspiration. Partnership is the new leadership."

Tikehau Investment Management - Mathieu Chabran, Co-Founder, Tikehau Capital: "5 years after the signature of the milestone Paris Agreement, there is still much progress to be made in order to meet the targets set. Asset managers worldwide have a major role to play in accelerating the transition towards a more sustainable and resilient economy. The Net Zero Asset Managers initiative, composed of asset managers representing 36% of assets under management worldwide, is a demonstration of the kind of commitment that the sector needs to continue making in the years to come. Tikehau Capital is proud to sign this initiative and reaffirm its conviction that economic growth and fighting climate change go hand-in-glove. Actively investing a model that better respects our environment is essential."

North America

Boston Common Asset Management - Lauren Compere, Managing Director, Boston Common Asset Management: "Joining the Net Zero Asset Managers initiative and committing to align our investing to a net zero carbon emissions by 2050 trajectory and a 1.5 degrees Celsius alignment is the next logical step for us. We look forward to collaborating under this initiative given that climate change is a systemic risk for every investor."

Boston Trust Walden - Amy Augustine, Director of ESG Investing, Boston Trust Walden: "The need for more collective, transformative action to manage and mitigate climate risk is clear given the current trajectory of global emissions. For decades, Boston Trust Walden has been instrumental in advancing climate solutions with company and policy influencers, both directly and in coalition. We are pleased to join the Net Zero Asset Managers initiative and work alongside other investors seeking to accelerate global efforts to achieve net zero greenhouse gas emissions by 2050 or sooner."

Brookfield Asset Management - Mark Carney, Vice Chair, Head of ESG and Impact Fund Investing, Brookfield Asset Management: "Addressing climate change is a global imperative and one of the greatest commercial opportunities of our time. The world is entering a critical period in which ambition and effectiveness of sustainable investments must be transformed. Building on its base as one of the largest private renewable power businesses in the world, Brookfield is determined to play a leading role in accelerating the transition to net zero by 2050 or sooner. As a global asset manager, we recognize that the commitment, collaboration, and capital of private finance is fundamental to addressing climate change and delivering the goals of the Paris Agreement. That is why we are delighted to join others as a signatory to the Net Zero Asset Managers initiative, which underscores our long-standing commitment to driving the complementary goals of sustainability and value creation across our investments and operations."

Capricorn Investment Group - Ion Yadigaroglu, Managing Partner, Capricorn Investment Group: "We are excited to commit to net zero emissions across the Capricorn Investment Group portfolios. We are seeing numerous opportunities to deploy capital in the fast-growing companies and technologies

of the new green economy, from the electrification of cars and trucks and airplanes, to the rollout of storage and battery systems of a fully renewable power grid, to the synthesis of green products from recycled and renewable sources. Far from constraining our investment horizons, we believe that following the science and the ambitions of the Paris Agreement will help us deliver better outcomes for our clients and for society.”

FullCycle – Ibrahim AlHusseini, Founder and Managing Partner, FullCycle: “Climate change is a race against time—but it’s not a race that anyone can win alone. The capital and the technology we need already exist, but to-date we have lacked a unifying framework to measure climate impact and guide the coordinated strategic prioritization of capital flows. At FullCycle we use the Carbon Return on Investment 20 to assess impact across industries and investment opportunities: we invite others to adopt this, and also to collaborate with us in refining the complete framework around which the industry can align. In the last century, finance was able to lift half the human population out of poverty. In this century, finance can play a defining role in bringing human civilization into harmony with the natural world.”

Lazard Asset Management - Ashish Bhutani, Chief Executive Officer, Lazard Asset Management: “The climate crisis we face has societal and financial implications. We have joined the Net Zero Asset Managers Initiative to hold ourselves accountable to deliver on our responsibility to protect our client’s portfolios from systemic risks such as climate change. Consistent with our fiduciary duty, we will work towards allocating capital to companies with long-term sustainable business practices to deliver better investment outcomes. In partnership with our clients, we will progress towards net zero emissions.”

Mirova - Philippe Zaouati, Chief Executive Officer, Mirova: “Generating impact through investment has been at the heart of Mirova’s mission since our inception. Working to reduce the carbon footprint of portfolios and engaging with companies are powerful tools to support a net-zero economy, and at Mirova we have been developing investment solutions to help our clients address these issues for several years now. The Net Zero Asset Managers Alliance shows an alignment among asset managers to prioritize zero-carbon solutions, and we are very optimistic in joining this coalition that portfolio decarbonization can and will accelerate.”

RockCreek – Afsaneh Beschloss, Founder and Chief Executive Officer, RockCreek: “With decades of experience investing in climate solutions, RockCreek’s global team is excited to sign-on to the Net Zero Asset Managers Initiative. There has never been a more critical moment than now for investors and asset managers to collaborate and signal the shift to net zero by insisting on transparency and bold action. The RockCreek team has been at the forefront of investing with consistent returns in sustainability and climate solutions for several decades, and supports this critical global undertaking.”

Terra Alpha - Tim Dunn, Chief Executive Officer of Terra Alpha, said: "Decarbonizing the global economy is Terra Alpha's primary impact focus. Joining the Net Zero Asset Managers initiative is a powerful way to collaboratively support this transition and help build a truly sustainable world.”

South America

JGP - André Jakurski, Founding Partner and Executive Director, JGP: “As an Asset Manager of more than 20 years, we believe in the importance of transgenerational thinking and inspirational leadership, therefore JGP is determined to lead by example by playing its part in signing the Net Zero Asset Managers initiative to provide a sustainable and prosperous future of our planet. As stewards

of over 5 billion dollars in AUM we aim to adopt increasingly stringent criteria of climate impact in our decision-making process for new investments, which includes helping to support and finance the transition towards a low carbon economy. We will make efforts to ensure that our operations will be carbon net zero by 2040 at the latest.”

Further founding partner comment

Asia Investor Group on Climate Change (AIGCC)- Rebecca Mikula-Wright, Executive Director, AIGCC: “It is fantastic to see fresh commitments to the Net Zero Asset Managers Initiative out of Asia as regional investors continue to accelerate their response to climate change risks and position themselves for the enormous opportunities in the clean energy transition. These new commitments from Nissay Asset Management and Maitri Asset Management are a practical demonstration of their commitment to managing climate risks and continuing to thrive in the global net zero economy.”

CDP - Paul Simpson, Chief Executive Officer, CDP “As a founding partner of the Net Zero Asset Managers initiative, CDP is delighted to see it continue to gather strong momentum and support. For more than 20 years, CDP has empowered the global asset management community with the tools to drive environmental transparency and action. As a sector that plays a critical role in the transition to a net zero carbon economy, CDP is encouraged by the growing number of asset managers committing to de-carbonize their portfolios. We look forward to seeing this translate into science-based emissions reduction targets, investment activity that is aligned with the Paris Agreement and near-term accountability and reporting.”

Ceres - Mindy Lubber, Ceres Chief Executive Officer and President, Ceres: “We are building a global movement towards net zero and it continues to grow by the day. Investors, like companies, understand they need to take real action, too. Not only do they need to call on the companies in their portfolios to act on climate change, but they also need to align their own investments with net zero. This is not just about shifting portfolios. It is about taking advantage of the biggest investment opportunities of our time.”

Investor Group on Climate Change (IGCC) - Emma Herd, Chief Executive Officer, IGCC: “The acceleration of the asset management industry’s response to climate change is critical to delivering on the aims of the Paris Agreement and protecting the global financial system from systemic physical and transitional risks. The expansion of participation in the Net Zero Assets Managers Initiative sends a further signal to the Australian and New Zealand markets that global capital is swinging behind a net zero emissions and resilient future.”

Institutional Investors Group on Climate Change (IIGCC) - Stephanie Pfeifer, Chief Executive Officer, IIGCC: “Over a third of the world’s AUM is now committed to securing a net zero and resilient future through the Net Zero Asset Managers initiative. We need to move the narrative to reflect this, no longer is this a coalition of the willing – this is a coalition of the determined. Ambition is matched by acceleration. The Net Zero Asset Managers’ commitment does not simply look to the future in 2050. Interim targets will be set for 2030, both indicating and driving the pace of transition adopted by the signatory asset managers. With 43 new signatories to the initiative, 73 of the world’s leading asset managers are now committed to meeting significant targets in this vital decade. We would encourage all asset managers to join us in securing a net zero and resilient future.”

Principle for Responsible Investment (PRI) - Fiona Reynolds, Chief Executive Officer, PRI: “As we approach COP26, the urgent need to transition to a low-carbon economy, and to have the right

framework to finance that transition, is incredibly clear. The finance sector is at a tipping point in its adoption of net-zero, and it's essential that actors across the investment chain alongside governments continue to take net-zero-related actions, and to be held accountable for those commitments through interim and longer-term targets. Asset managers play a critical role in this transition, both in the mandates they execute from asset owners, and in their own investment focus."

Further comment:

Generation Investment Management - Edward Mason, Director of Engagement and Impact Reporting, Generation Investment Management: "The rapid growth of the Net Zero Asset Managers initiative is breath-taking. Our focus as advisory group members is resolutely on delivery. In time for COP26, the initiative must now focus on ensuring ambitious targets are set for assets to be managed in line with net zero by 2050 or sooner, using the rigorous methodologies required by the initiative."

Note to Editor

For full details of the commitment made by signatories and a Q&A see www.netzeroassetmanagers.org (website goes live in line with embargo)

About the Net Zero Asset Managers initiative

The Net Zero Asset Managers initiative is a group of international asset managers committed to supporting the goal of net zero greenhouse gas emissions by 2050 or sooner, in line with global efforts to limit warming to 1.5°C; and to supporting investing aligned with net zero emissions by 2050 or sooner. The initiative will be managed globally by six founding partners: Asia Investor Group on Climate Change (AIGCC), CDP, Ceres, Investor Group on Climate Change (IGCC), Institutional Investors Group on Climate Change (IIGCC) and Principles for Responsible Investment (PRI). The initiative is also endorsed by The Investor Agenda, of which the investor networks are all founding partners.

The Net Zero Asset Managers commitment

In line with the best available science on the impacts of climate change, we acknowledge that there is an urgent need to accelerate the transition towards global net zero emissions and for asset managers to play our part to help deliver the goals of the Paris Agreement and ensure a just transition.

In this context, my organisation commits to support the goal of net zero greenhouse gas ('GHG') emissions by 2050, in line with global efforts to limit warming to 1.5°C ('net zero emissions by 2050 or sooner'). It also commits to support investing aligned with net zero emissions by 2050 or sooner.

Specifically, my organisation commits to:

- Work in partnership with asset owner clients on decarbonisation goals, consistent with an ambition to reach net zero emissions by 2050 or sooner across all assets under management ('AUM')
- Set an interim target for the proportion of assets to be managed in line with the attainment of net zero emissions by 2050 or sooner
- Review our interim target at least every five years, with a view to ratcheting up the proportion of AUM covered until 100% of assets are included

In order to fulfil these commitments my organisation will:

- For assets committed to be managed in line with the attainment of net zero emissions by 2050 or sooner (under commitment b)
- Set interim targets for 2030, consistent with a fair share of the 50% global reduction in CO₂ identified as a requirement in the IPCC special report on global warming of 1.5°C
- Take account of portfolio Scope 1 & 2 emissions and, to the extent possible, material portfolio Scope 3 emissions
- Prioritise the achievement of real economy emissions reductions within the sectors and companies in which we invest
- If using offsets, invest in long-term carbon removal, where there are no technologically and/or financially viable alternatives to eliminate emissions
- As required, create investment products aligned with net zero emissions by 2050 and facilitate increased investment in climate solutions

Across all assets under management

- Provide asset owner clients with information and analytics on net zero investing and climate risk and opportunity
- Implement a stewardship and engagement strategy, with a clear escalation and voting policy, that is consistent with our ambition for all assets under management to achieve net zero emissions by 2050 or sooner
- Engage with actors key to the investment system including credit rating agencies, auditors, stock exchanges, proxy advisers, investment consultants, and data and service providers to ensure that products and services available to investors are consistent with the aim of achieving global net zero emissions by 2050 or sooner
- Ensure any relevant direct and indirect policy advocacy we undertake is supportive of achieving global net zero emissions by 2050 or sooner

Accountability

Publish TCFD disclosures, including a climate action plan, annually, and submit them to the Investor Agenda via its partner organisations for review to ensure the approach applied is based on a robust methodology, consistent with the UN Race to Zero criteria, and action is being taken in line with the commitments made here.

We recognise collaborative investor initiatives including the Investor Agenda and its partner organisations (AIGCC, CDP, Ceres, IGCC, IIGCC, PRI, UNEPFI), Climate Action 100+, Climate League 2030, Paris Aligned Investment Initiative, Science Based Targets Initiative for Financial Institutions, UN-convened Net-Zero Asset Owner Alliance, among others, which are developing methodologies and supporting investors to take action towards net zero emissions. We will collaborate with each other and other investors via such initiatives so that investors have access to best practice, robust and science-based approaches and standardised methodologies, and improved data, through which to deliver these commitments.

We also acknowledge that the scope for asset managers to invest for net zero and to meet the commitments set forth above depends on the mandates agreed with clients and clients' and managers' regulatory environments. These commitments are made in the expectation that governments will follow through on their own commitments to ensure the objectives of the Paris Agreement are met, including increasing the ambition of their Nationally Determined Contributions, and in the context of our legal duties to clients and unless otherwise prohibited by applicable law. In some asset classes or for some investment strategies, agreed net zero methodologies do not yet exist. Where our ability to align our approach to investment with the goal of net zero emissions by 2050 is, today, constrained, we commit to embark with determination and ambition on a journey, and to challenge and seek to overcome the constraints we face.
